

Summary

- Software developer with full-stack experience building and deploying scalable applications
- Experience leveraging AI-assisted tools across the software development lifecycle to improve development speed and code quality
- Proven ability to troubleshoot, debug, and resolve production issues in high-reliability environments
- Strong background collaborating in Agile teams to deliver solutions aligned with business and technical requirements
- Currently developing an Android application in alpha testing, demonstrating end-to-end ownership from design through deployment

Technical Skills

- **Languages:** Java, JavaScript, Typescript, PHP, Python, SQL
- **Frameworks/Libraries:** Laravel, React
- **Tools & IDEs:** IntelliJ IDEA, Android Studio, VS Code
- **Version Control:** Git, GitHub
- **Databases:** MySQL, relational databases
- **Development Practices:** Agile, Scrum, SDLC, Test-Driven Development (TDD)
- **Technologies:** REST APIs, SaaS applications, CI/CD concepts
- **Additional:** AI-assisted development tools

Experience

Event Technology Specialist, 2023 - Current

Metropolitan Community College - Omaha, Nebraska

- Provided real-time technical support and issue resolution in high-availability environments
- Diagnosed and resolved system issues under time constraints, ensuring minimal disruption
- Collaborated with stakeholders to support technical operations and system reliability

Android Developer-Animal Behavior Observer (Independent Project), 2026 - Present

- Designed and developed an Android application currently in alpha testing
- Applied AI-assisted development tools to accelerate coding, debugging, and testing processes
- Implemented core application features including UI components and business logic
- Followed SDLC best practices, including iterative development, testing, and performance optimization
- Continuously improving application based on user feedback and testing results

Full Stack Developer, 2023 - 2024

Nebraska Innovation Labs - Omaha, NE

- Designed, developed, and deployed a scalable SaaS application using Laravel, React, and MySQL
- Built and maintained RESTful APIs to support frontend-backend communication
- Collaborated in an Agile development environment to define requirements, prioritize tasks, and deliver features
- Performed debugging, issue triage, and production support, improving system reliability and performance
- Managed source code using Git (GitHub/Bitbucket) and implemented version control best practices
- Contributed to code quality improvements through testing and structured development practices
- Mentored junior developers and conducted code reviews to ensure maintainability and scalability

Lead Research Specialist, 2018 - 2022

Emory National Primate Research Center - Lawrenceville, Georgia

- Managed and maintained large-scale datasets, ensuring data integrity and compliance
- Developed automated systems that improved operational efficiency and reduced downtime

- Performed technical troubleshooting and system maintenance, increasing reliability
- Collaborated with cross-functional teams to support operational and technical initiatives
- Trained staff on system usage, improving efficiency and reducing user error

Instructor, 2015 - 2018

Duke University Talent Identification Program - Durham, North Carolina

- Effectively taught neuroscience and biological and chemical sciences courses to gifted middle and high school students, achieving a 4.7/5 rating from staff and students.
- Developed comprehensive lesson plans and prepared engaging laboratory materials to enhance student learning.
- Coordinated weekly events with teaching assistant and administrative staff to facilitate a collaborative learning environment.

Education

2026 Metropolitan Community College - Omaha, NE

Associate of Science Computer Science

- Relevant Coursework: Computer Science, Java Programming, Python Programming, C Programming Database Design, Data Science
- Developed proficiency in object-oriented programming (OOP) using Java and Python
- Built foundational knowledge of data structures, algorithms, and problem-solving techniques
- Designed and implemented relational databases, including schema design and query development (SQL)
- Gained experience writing and debugging code across multiple languages (Java, Python, C)
- Applied software development lifecycle (SDLC) concepts, including testing and iterative development
- Completed programming projects involving data processing, logic implementation, and system design

2017 Roehampton University - London, UK

Master of Research Primate Biology, Behavior, and Conservation

- Graduated with honors
- Thesis: "Reciprocity Mechanisms in Chimpanzees (*Pan troglodytes*)"
- Applied statistical analysis using R and SPSS for research data modeling and interpretation
- Experience with data analysis, hypothesis testing, and experimental design
- Conducted data collection, data cleaning, and data validation on large behavioral datasets
- Utilized GIS tools and social network analysis techniques for complex data evaluation
- Developed technical writing and data presentation skills for academic and research audiences

2015 Emory University - Atlanta, Georgia

Bachelor of Science Neuroscience and Behavioral Biology, Biology

- Relevant Coursework: Intro to Inferential Statistics (with lab), Research Methods in Biology
- Developed foundational skills in statistical analysis, data interpretation, and scientific computing (R)
- Conducted literature reviews, data analysis, and research reporting
- Built strong analytical and problem-solving skills applicable to software development and system design
